This bright, spacious area that flanks both sides of the building is not just stunningly beautiful or the main entrance to the other venues—it can also be the central feature of any event. This hall is very special. It's great for exhibiting and presenting, for showing off and spreading the word, for making statements, for taking risks and chances— whatever the product, whatever the event. Because it's versatile and multifaceted. Because it's unadorned so that you can dress it up as you like. That said, don't forget its own peculiar style: a highly original wall of different windows that will flood your event with natural light and huge beams to lend strength of character to your event.

Excellent conditions for meetings, presentations, exhibitions, formal dinners and cocktails for small groups and up to 300 people, depending on how the area is used.
